Surveyed by the Matienzo Expeditions 2008 - 2012

Version 2.15 - completed 26th August 2012 (Upstream dive to Bassenthwaite 12_02 added)

Printed full size, at 1:500, this survey requires a sheet about 240cm wide by 420cm long

Various pdf files of this version exist. The lowest quality, eg 2889-2_07-lq, has poorly rendered passage colour fills and outline but a small file size (approx 2Mb). The medium quality, eg 2889-2_07-mq, has reasonable passage colour. (approx 9Mb). The highest quality file, eg 2889-2_07-hq has a size of approx 120Mb.

Note 1: (Feb07)(a) Rising up from chamber over a lip is a thin drop on the left to a small chamber with a rock floor. Bearing south-east (at first) this is a fairly straight but narrow passage which after about 40m drops down to a sump. Bolts were placed for research but remains unexplored. On the light a crawl soon chokes. However, the crawl is in a fairly good position and may be worth digging if other options fail.
Note 2: (Nov 2012) (a)(f) is possibly the first 7m ladder pitch.
Note 3: (Nov 2012) (a) Bassenthwaite Pitch is a 7m ladder pitch in two stages.
Note 4: (Nov 2012) (a) 8m ramp from approximately 40m to a choke. Not straight looks on DVTAB.
