TORCA DE LA CABAÑA #0036 (TORCA DE LA VERA NEGRA)

NOTES:

Drawn survey is the published 1974 version fitted to the red centre line produced in 1992 - it agrees quite well and shows lines outside the drawing - presumably extensions.

These extensions were not found in 2026.

The **Wiggle Passage** extension 0036-26-01 is shown as a scan of the pencil drawing around the centre-line. Within *Affinity Designer 2*, the drawing is imported both as a jpg and transparent png.

Because of the red-line extensions, some suspicious legs (60m+), and the presence of Vallina's *Gallery of Dreams* at the same level, the whole cave should be resurveyed, taking note of all logbook entries from 1992 and others.

An ideal project for a group to take on - from rigging, pushing, photos, videos and surveying through drawing up the survey and derigging.

This page compiled in *Affinity Designer 2* by Juan Corrin, Sept. 2026
