site 2889: Torca La Vaca

Surveyed by the Matienzo Expeditions 2008 - 2013

Version 2.16 - completed 21st May 2013. (Downstairs-upstream extension added, batch 13_01)

Printed full size, at 1:500, this survey requires a sheet about 240cm wide by 420cm long

Various pdf files of this version exist. The lowest quality, eg 2889-2_07-lq, has poorly rendered passage colour fills and outline but a small file size (approx 2Mb). The medium quality, eg 2889-2_07-mq, has reasonable passage colour. (approx 9Mb). The highest quality file, eg 2889-2_07-hq has a size of approx 120Mb.

Note to UPdaters: Rarely go from chamber over a lip to a thin drop on the left to a small chamber with a rock floor. Nearly always it is a mistake caused by the 3D view. Also, the 3D view is very bad at showing which way a drop falls away (except for Hassans's lot) meaning it is easy to place a new section on the wrong side of the drop. Also, Hassans's lot sometimes place sections in the middle of a pitch. Note to UPdaters: Rarely go from chamber over a lip to a thin drop on the left to a small chamber with a rock floor. Note to JD: Check up on all "dead end" passages. Many were made by pushing up the large flat floor this year. Some can go much further.

Note to Hassans: Check for "digital dust" passage where depth from end of 1 metre way. Resulted in
