

Surveyed 1975-2013 by J. Yeardon, L. Mills, M. Wood, P. Smith, S. Martin, Jenny Corrin, Carol Smith, I. Chandar, P. Papard, Carmen Smith, J. Sims, N. Dibben, T. Howard, A. Ives, P. Hall, Darren Jarvis, Fran McDonald, Alba Castillo. Drawn by P. Smith

- Notes
- (1) The connection to the bottom entrance, Cueva Tiva, is currently blocked by domestic waste.
 - (2) Both the original Spanish survey (Cuadernos II) and the 1975 survey show a 40m long passage at this point
 - (3) About 250m was surveyed in the Tonto Series in 1975 but this still needs re-surveying
 - (4) In 1975, climbing up the rock slope led to a roof tube above the main stream passage.
 - (5) The pitch can be by-passed by dropping down a rift in the passage on the right. At the bottom, a stream can be followed to a cascade chamber and choke.
