

Map showing the centre line of Toad in the Hole with other centre lines and entrances in the vicinity

## Torcón de la Calleja Rebollo

Site 0258: also called Toad in the Hole. Seidesueto, Matorra de Ruenga, Cantabria. 30T 448780 4795064 Datum: ETRS89. Altitude 293m. Length: 8208m. Depth: 118m.

This survey version 0258-2023s-02 is based on version 0258-Toad 07.pdf. All the old scans included there have been reviewed with extra passage detail and cross sections added.

Surveyors up to 1998 are listed on version 0258.pdf. Surveyors from 2007, 2008 and 2012 include J. Carlisle, E. Heron, S. Domeney, P. Stacey, S. Flower, R. Lawson, C. Smith, D. Smith, T. Clayton plus ?

Surveyors for 2023 (survey batches 23-01 and 23-02) are Simon Cornhill and Diane Arthurs.

Previous final drawings by Alasdair Neill, Juan Corrin and Madphil Rowsell. Parts of this drawing originated on an Acom Archimedes computer and have been through a number of drawing packages including Adobe Illustrator. This is probably the explanation for some of the jagged older passage outlines with artefacts at high resolution. This drawing 2028-2023s-02 in Affinity Designer 2 is by Juan Corrin. 5/11/2023
