

## Notes accompanying Cueva Hoyuca survey file: 0107-Entrance\_Series\_Easter2011.png

Find attached the Uzueka entrance series all drawn up for all survey data up to the present. Areas that are new on this survey compared to the last version published on the website are:

**Quadraphenia:** Redrawn from squeeze to join up with 2009 resurveyed section near Pull Up passage using 2010 resurvey. Flyover route from entrance also full drawn up for the first time.

**Dog Series:** Completely redrawn from resurvey done in 2010

**Vampire Gallery:** Redrawn and extension added from 2010 exploration.

**Pig Trotter chamber area:** Chamber to downstream sump redraw from 2011 resurvey

**God Knows series:** Entire lower level and Goldies Way and the Real Sima Baz drawn up to the extent of resurveyed data. This is the first time this area has been drawn up ever to my knowledge.

Title box: Some more names added who were missing. Found the names on the survey notes. If you spot anyone else missing from older survey trips then please let me know.

I have also offset the original Sima Baz passage and streamway so that it does not overlap the new resurvey of this area. We have not been able to tie up the old and new surveys of this streamway to find any clear points of correspondence, so this drawing gives the current state of play and a resurvey from the Pig Trotter Chamber end, through the wet crawl and down to this streamway is required to definitively close that loop.
